Ahmedabad, Gujarat

BCA Honours with Research student at Gujarat University with hands-on experience building full-stack web applications using Python, Django, and Flask. Completed a software development internship where I worked on backend API development and contributed frontend work to a live donation platform. Built 3 independent projects spanning e-commerce marketplaces, civic-tech platforms with machine learning-based automation, and API-driven browser tools. Seeking a Python Developer internship to apply strong programming fundamentals and deliver clean, reliable code.

WORK EXPERIENCE

Amin Softtech LLP

Dec 2025 – Jan 2026

Software Development Intern

- Completed an intensive backend and full-stack training program covering Python fundamentals, OOP, file handling, MySQL database design, and Flask REST API development (GET/POST/PUT/DELETE routes with JSON responses), culminating in a full-stack mini project tested with Postman.
- Contributed as a frontend developer using React on a live Zakat donation platform: built user interfaces for the cause-creation workflow (image/PDF proof upload, category selection, bank detail submission) and a cause-status tracking view for users.

EDUCATION

Gujarat University, Asia Pacific BCA College

2023 – 2027

Bachelor of Computer Applications (Honours with Research) — CGPA: 8.0 / 10 (81%)

PROJECTS

Seed2Sell – E-Farming Marketplace (Final Year Academic Project)

Tech: Django, Python, HTML, CSS, JavaScript, SQLite | GitHub: [github.com/misbahsaiyed20/Seed2Sell](#)

- Built a full-stack e-commerce marketplace connecting farmers directly with buyers, removing middlemen and enabling transparent pricing through 3 role-based modules: Farmer, Buyer, and Admin.
- Designed the database schema and implemented CRUD workflows for product listings, order processing, and payment handling using Django ORM, with a responsive UI for browsing, comparing, and purchasing products.

FixMyArea – Civic Issue Reporting Platform

Tech: Django, Python, HTML, CSS, JavaScript, Machine Learning | GitHub: [github.com/misbahsaiyed20/FixMyArea](#)

- Developed a civic-issue reporting platform enabling citizens to report potholes, garbage, water leakage, and electricity issues, with image uploads and interactive map-based location tracking.
- Built a machine learning-based auto-category suggestion feature (TF-IDF + Logistic Regression) achieving ~71% cross-validation accuracy, served via AJAX, along with user authentication and duplicate-issue detection.

AI Webpage Summarizer – Browser Extension

Tech: Python, JavaScript, HTML, CSS, Gemini API | GitHub: [github.com/misbahsaiyed20/webpage-summarizer](#)

- Built a browser extension that generates concise webpage summaries on demand using the Google Gemini API, with a Python backend for content extraction and a JavaScript-based extension frontend.

SKILLS

Languages: Python, JavaScript, PHP

Frameworks & Libraries: Django, Flask, Laravel, React

Web Technologies: HTML5, CSS3, REST APIs, AJAX

Databases: SQL, MySQL, SQLite

Tools & Platforms: Git, GitHub, Postman, VS Code

CERTIFICATIONS

-
- Software Engineering Job Simulation — JPMorgan Chase & Co. (Forage), May 2026
 - Data Science Job Simulation — British Airways (Forage), May 2026
